Profile

I am a Computer Science graduate with a 2:1 MSci. I have excellent communication and administrative skills developed from being a member of a number of committees during my time at the University of Nottingham. I am a strong worker under pressure, able to quickly make decisions based on information available to me, and I have a good ability to convert someone's request into a more technical format, whatever that format might be. I am also a strong collaborator within a team, and am always keen to share any experience, tips, or tricks with those who need or want them in order for the team I am a part of to be as strong as it can be.

Education

2015–present	University of Nottingham, MSc Computer Science, 2:1 Modules including: <ul style="list-style-type: none">- C++ Programming (77%)- Fundamentals of Information Visualisation (83%)- Software Engineering Group Project (90%)- Individual Programming Project (70%)
2013–2015	Beverley Joint 6th Form, A-Levels Maths A Physics B Chemistry B

Experience

2017–present	Master Carpenter, Nottingham New Theatre Responsibilities including: <ul style="list-style-type: none">- General oversight of set design and construction for 30+ shows per academic year- Maintenance of the theatre workshop and the tools within it- Refurbishment work prior to the University year commencing- Presence at all changeovers in this period, 2 per week
--------------	---

Skills

As a result of my having been Master Carpenter at the Nottingham New Theatre I am proficient in the usage and training of many power and manual tools. Beyond this I am a fast learner, having had

to become familiar with new pieces of equipment as I added them to the workshop inventory. I was heavily involved in set construction - credited as such for 8 shows over the two years of my involvement - as well as broader areas of tech and backstage, having been a venue technician at the small fringe festival the New Theatre runs yearly, and having been brought into multiple shows as "emergency sound designer".
